SAARTHAK PANDIT

B.Tech AI & ML Student | Python Developer | Aspiring Software Engineer

9857792206 | panditsaarthak586@gmail.com | linkedin.com/in/saarthak-pandit-a7b7a4319 | github.com/saarthak-pandit27

PROFILE

B.Tech Artificial Intelligence & Machine Learning student at Amity University Punjab, Mohali, with hands-on experience building AI/ML applications and web products. Strong foundation in Python, machine learning, computer vision, data handling, and application development. Built and deployed SnapClass, an AI-powered attendance and classroom management system, along with real-time computer-vision and predictive ML projects. Seeking software engineering / AI-ML internship opportunities.

EDUCATION

Amity University Punjab, Mohali — **2025 – 2029**
B.Tech — Artificial Intelligence & Machine Learning

Him Academy Public School Vikasnagar — **2025**
CBSE, PCM — Class XII: 82%

Glory Public School — **2023**
State Board — Class X: 96.15%

TECHNICAL SKILLS

Programming: Python, C, C++, Java

AI / ML: NumPy, Pandas, Scikit-learn, Matplotlib, OpenCV, MediaPipe, TensorFlow

Web / App: HTML, CSS, JavaScript, Streamlit, Flask, REST APIs

Databases: MySQL, PostgreSQL, SQLite, Supabase

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Anaconda, Conda

Cloud / Deployment: Streamlit Cloud, Render, Vercel

Core Coursework: Data Structures & Algorithms, OOP, DBMS, Computer Organization, AI/ML

PROJECTS

SnapClass — AI-Powered Attendance & Classroom Management System | 2026 – Present

- Developed and deployed an AI-powered attendance and classroom management platform using Python and Streamlit.
- Implemented face-recognition attendance workflows, voice attendance support, authentication, subject enrollment, and student/teacher dashboards.
- Used Supabase for backend data management, GitHub for version control, and custom CSS for a modern responsive interface.
- Deployed the application on Streamlit Cloud.

AI Real-Time GYM Coach | 2026

- Built a real-time computer-vision fitness coach using Python, Streamlit, OpenCV, MediaPipe, and Streamlit-WebRTC.
- Implemented pose-based exercise detection and automatic repetition counting for squats, push-ups, biceps curls, shoulder press, and lunges.
- Added exercise-form analysis, workout tracking/history, and AI-generated voice coaching using an LLM-based feedback layer.
- Designed the system as an interactive webcam application for real-time user feedback.

CreditSense AI — Intelligent Loan Approval Prediction System | 2026

- Built a machine-learning loan approval prediction system using Python, Pandas, NumPy, and Scikit-learn.
- Performed data preprocessing, exploratory analysis, model training/evaluation, and comparison of multiple classification models.
- Designed a dashboard concept with prediction confidence and explainable decision outputs for practical loan-screening use cases.

Smart Clustering System | 2026

- Developed an unsupervised-learning project for grouping data points into meaningful clusters.
- Applied data preprocessing and clustering workflows with Python, NumPy, Pandas, and Scikit-learn.
- Evaluated cluster behavior and visualized results to make patterns easier to interpret.

STRENGTHS

Problem Solving • **Quick Learner** • **Team Collaboration** • **Communication** • **Entrepreneurial Mindset**
